Model construction for X-Plane Flight Simulator

AB Air Version 1.0
October 2006

ABOUT AB AIR

The goal of the fictional Andrew Benzie Airlines is to assemble, upgrade and maintain a diverse fleet of high-quality X-Plane air, ground and water vehicles which meet the following standards:

- Fully operational in X-Plane version 8.50+
- Consistent exterior paint schemes in the aqua/blue AB Air livery, with realistic exterior lighting
- Easy to read/operate revised custom cockpits with animated controls wherever possible
- Custom sounds (horn, ship's calls, etc.) wherever possible
- Documentation, including original and updated ReadMe files along with new Operation Guide

This project was originally intended for private use, but with the kind approval of the original authors, AB Air is proud to make much of its fleet available for use by the general public.

ABOUT THE AUTHOR

Veteran sim-pilot Andrew Benzie evolved to X-Plane 8 via the FA-18 Hornet and Fly2K! series of flight simulator applications. His education and background in graphic design and computers provides him a great foundation for X-Plane vehicle design and construction. His tool of choice is an Apple Intel Dual-Core Macintosh G5. He is currently a professional musician and educator in the San Francisco Bay Area.
