

SPEED FAN BOAT

Rebuild by Andrew Benzie
andrew@andrewworld.com

for X-Plane v8.50

AB Air Version 1.0
October 2006

Please Note: This vehicle is an updated and/or modified version of another author's original work. Please refer to the original README file (located within the same directory as this file, if available) for more information. I have obtained the original author's permission whenever necessary. I would like to sincerely thank the original author(s) for providing me a solid foundation on which to build; without their work this release would not be possible. This guide is not to be misconstrued as a reference for real-world applications.

HISTORY

This is a rebuild of the Speedboat by Marcos. Please see the ReadMe Original folder for more information.

Although this craft also drives well on land, its best suited for water travel. Sleek design allows fast skimming – check wind direction at higher speeds, it is possible to capsize.

Don't forget to turn on the navigation lights at night.

the speed fan boat in action

an animated steering wheel and sound effects enhance the sim boating experience

WHAT'S NEW

- new exterior paint job/lighting
- retooled engine
- new easier to read/operate custom cockpit with animated steering wheel, autopilot, etc.
- other tweaks here and there

A flight yoke works great for the rudder. The brakes only work on land. Raise the landing gear while traveling on water.

Comments are always appreciated:
