*control x-train pensinsular with the throttle (left knob),  
the air brakes (middle lever), and the bell/horn (upper left/right)*

**Please Note:** The X-Train railcar is a realistic representation of actual electric train operation. However, due to limitations in my knowledge of actual train operation as well as limitations within the functionality of X-Plane, inaccuracies exist.

*\*To manually operate the Horn, Throttle, and Emergency Power Shutoff, click and hold, then drag button up or down.*
